

# ST Advisor GPS Tracking Device

## Tracking and Remote Access – At One Affordable Price

SageTracker Fleet is one of the smallest, most economical, and powerful wireless IP ruggedized mobile tracking devices available today. Ideal for tracking and managing your businesses' fleet assets, the SageTracker Fleet is a unique and practical device for any type of commercial transporter.

Utilizing the latest GPRS/GSM cellular technology, the ST Advisor provides a simple, turn-key GPS tracking solution anywhere a wireless cellular signal is available. With surprisingly simple installation, the device is hard-wired to the vehicle battery and instantly begins transmitting data and location reports each time the ignition is started. This feature saves money by avoiding both repeated disposable battery replacements as well as unnecessary

### **Key Features:**

- Ability to Poll In Real Time
- Fast Location Report Update Intervals Delivered Up to Every 30 Seconds
- Never Worry About Batteries
- Device Reset With Every Ignition Start
- Lowest Cost of Ownership for Fleet Applications
- Installation Required (but not difficult!)

## **Easily Adapts To Provide A Variety of Tracking Data**

ST Advisor allows complete flexibility for a user to customize the unit to a variety of mobile telemetry tracking applications. Whether it's speed, mileage, events, locations, or emergencies the ST Advisor provides comprehensive vehicle tracking and remote information accessible from any computer with a live internet connection. The ST Advisor is also equipped with wireless voice and data ports available for the localized user to utilize e-mail or voice communication with the device's end-user.

## **Manage Accountability and Productivity – Increase Profits**

The ST Advisor can help to increase overall efficiency with the ability to monitor driver's routes and stops, and reduce delays and side jobs. Account for operator safety by receiving alerts on excessive speeds and times spent at unauthorized or dangerous locations. SageTracker Fleet can also aid in reducing overall operating costs attributed to high fuel consumption, recurring maintenance issues, as well as provide more accurate customer billing data and true service costs.

For more information on how the ST Advisor GPS tracking technologies can become an integral part of your fleet tracking and management solutions contact us today at 512.542.9668, or visit us online at [www.worldtrackingsolutions.com](http://www.worldtrackingsolutions.com)
